

Are You An African-American Woman Who Has Recently Been Diagnosed With Breast Cancer?

If so, we would like to hear about your experiences with diagnosis, treatment and recovery. Your voice is important and valuable to us.

Who May Participate?

Participants must be African American, have been diagnosed with breast cancer within the past 3 months and planning to receive treatment other than surgery alone (ex. chemotherapy or radiation therapy), and at least 21 years of age. Participants receive an electronic tablet and earn \$10 for each short, weekly survey completed. To see if you're a good match for the study, please go to go.iu.edu/1jFv.

To apply to be part of this study or for more information, please contact
